Definitions

September 2017 quarter: (July, August, September 2017)

Capital goods: are produced assets that are used repeatedly or continuously, for longer than one year, in industrial production processes. Examples are machinery, trucks, and aircraft.

cif: is the cost of goods, including insurance and freight to Samoa.

Consumption goods: are goods used (without further transformation in industrial production processes) by households, government, or non-profit institutions serving households.

Exports (domestic): are goods of domestic origin exported from Samoa to another country. Exports in this release are valued fob and are shown in Samoan tala.

fob: is free on board (the value of goods at Samoa ports before export).

Imports: are goods imported into Samoa. Imports in this release are valued at cif and are shown in Samoan tala.

Intermediate goods: are goods used up, or transformed in, industrial production processes.

Merchandise trade: covers exports or imports of goods that alter the nation's stock of material resources.

Provisional: statistics for the latest three months are provisional, to allow late data and amendments to be included.

Re-exports: are exports of foreign goods which were previously recorded as Samoa's imports.

Trade balance: is calculated by deducting imports (cif) from exports (fob). These two valuations are not entirely comparable, because the cif valuation includes insurance and freight to Samoa, while the fob valuation excludes insurance and freight from Samoa.

Trade deficit: occurs when the value of imports is more than the value of exports.

Trade surplus: occurs when the value of exports is more than the value of imports.
