PREFACE

The Population and Housing Census (PHC) 2021 was taken on the 6th of November 2021. It was the 11th census conducted by the Samoa Bureau of Statistics since Samoa gained Independence on January 1st 1962. This is the first census that the Computer Assisted Personal Interview (CAPI) method was used to collect information compared to the use of Paper and Pencil Interview (PAPI) method in previous censuses. This is the second report published for the Population and Housing Census 2021. In the previous censuses, analytical reports were prepared, however the users especially students found it too technical for their purposes and we have changed our approach by preparing the basic tables in this document and a separate **Fact sheet** in which the high-level indicators collected by the census are provided in a very simple way. The next series of reports using the census dataset will include the 51 districts profiles, the disability, gender and youth monographs. Additional information will also be made available upon request, on any particular dataset, based on the information collected in the 2021 census. We encourage planners, policy-makers, the businesses, non- governmental organizations and the community at large to make good use of these data for decision making and to formulate relevant policies that would further improve the social and economic developments for Samoa.

The PHC 2021 is one memorable activity since it implemented during the year of the outbreak of the deadly disease the COVID 19 pandemic and the sudden passing away of the former Government Statistician Ms Aliimuamua Malaefono Taua Faasalaina Taaloga and these lead to the delay in some of the census planned activities.

The census was funded by the Government of Samoa with financial assistance by the UNFPA. The Bureau also acknowledged with much appreciation the support provided by the people of Samoa especially in providing information that have been part of the survey. Finally, I commend the Management and staff who have been actively involved in the conduct of the Population and Housing Census 2021.

IA SAGA FAAMANUIA LE ALII -FAAFETAI.

Leota Aliielua Salani
Government Statistician/CEO

INTRODUCTION

Taking of the Population and Housing Census 2021

The Census of Population and Housing is one of the important sources of statistical information for planning and policy making purposes. It entails a great deal of information relating to social, demographic and economic characteristics of the whole population.

The census counted all persons who were present and been living in Samoa for at least three months on census night (November 6th 2021) excluding Samoans who were overseas for more than three months or visiting Samoa at the time for less than three months. The census was coordinated by the Samoa Bureau of Statistics.

The Statistics Act 2015

The conduct of the Population and Housing Census 2021, was conducted pursuant to Part II, Section 7 of the Statistics Act 2015, whereby the Samoa Bureau of Statistics (SBS) is required to conduct the census of population and housing every five years, to meet national data needs of all stakeholders or to conduct the census at any other time as seen fit by the Minister of Statistics. .

Preparation and financial assistance

The total cost of the PHC 2021 is amounted to ST1, 803,560.00. The Government of Samoa funded the activity with financial assistance of around ST100, 000 from the UNPFA, which supported census publicity and awareness programs.

Publicity and census awareness

The publicity of the census 2021 theme “Everyone counts” or “E taua ma faitau tagata uma” in the Samoan language started in October 2020 up until the census enumeration was completed in the second week of November 2021.

Listing and Mapping

Before any census undertaking a listing of the households in all villages is updated to ensure that all households will be covered during the census enumeration. The fieldwork took three months (August 2020 – October 2020) to cover more than 30,000 households. Twenty teams of eleven persons per team, were involved in the exercises.

Questionnaire design and users' consultation seminars

In order to identify the user's data needs, questionnaire consultation is always conducted. For the census 2021, the users consultation seminars were conducted for seven consecutive days (June 8th -16th 2021) in which all stakeholders from various sectors of the economy were invited to provide data needs to be collected during the census. At the end of the seven days consultations, all new questions were compiled for final selection by Samoa Bureau of Statistics. In fact, not all the users' data needs have been included in the final 2021 census questionnaire due mainly to the cost involved and limited time for census enumeration. Therefore, the final selection of questions was based on the linkage of the data being requested and the list of statistical indicators in the **'Pathways for the Development of Samoa (PDS) 2021/2022-2025/2026'** and the **'Sustainable Development Goals' (SDGs) 2030**. All data requests outside of the two frameworks were put aside to be integrated in other more appropriate survey activities by the bureau.

The consistency of census questions with previous censuses and social and demographic definitions were kept for consistency and monitoring. To meet international standards, the International Classification of Occupations (ISCO 08) and International Classification of Industries (ISIC Revision 4) were also used as frameworks for occupation and industry definitions respectively. This is also the first census in which the 4digit codes of the two frameworks were used in order to get the details breakdown of the occupation and the industries in which the employed population are engaged to.

Census pilot-testing and lessons learned

The main purposes of the census pilot test were: to find out if the contents and flow of census questions were practical; to find out if the design layout was manageable for interviewing; to find out if the manual of instructions were sufficient to help the enumerators on the field; to find out if the training was effective and, lastly to find out how the system used for data processing works using the CAPI system. The pilot fieldwork was conducted at the village of Leauvaa on the 14th of October 2021.

Organization of fieldwork and questionnaire quality checks

The census date was **November 6th, 2021**.The enumeration started two weeks before the census date in order to give enumerators sufficient time to visit and enumerate their allocated households. This is the first time temporary workers were hired as enumerators to conduct the census enumeration. They were recruited starting with the training for five days a week. This follows our experience in using teachers and government employees in which some of them withdrawal in the last minute, which really affect the fieldwork preparations. Another major challenge during this time is the national exam weeks always fall in the census enumeration period.

A total of 220 temporary workers were recruited to help the SBS on the field work and the first to employ a person with disabilities, which supporter-enforces the theme for the 2021 Population and Housing Census. **“Everyone counts”**.

For the census transportation, a total of 25 vehicles were used in the operation, with 8 vehicles provided by the Ministry of Finance from the pool of vehicles used for the Pacific Games, 6 vehicles from other Government Ministries namely Ministry of Women Community and Social Development, Ministry of the Prime Minister and Cabinet, Ministry for Revenue, Ministry of Justice, Courts and Administration, Ministry of Natural Resources and Environment and the rest were hired vehicles.

Challenges

The sudden passing away of the former Government Statistician towards the final week of data collection really affected the enumeration process, as staff was mourning the sudden event with so many emotions, in remembrance of her and her great contribution to the development of statistics in Samoa for many years.

The spread of the COVID 19 to Samoa, that imposed lockdown and restrictions to travel even within Samoa further imposed delays in the census activities, especially with the call-backs. The State of Emergency restrictions lead to the process of Data Integration, with face to face interviews put on hold.

The commuting of people on everyday basis was the other major challenges noted as most of the households had a vehicle for ease of travelling out of their home every time and this leads to the delay in data collection in some areas as the enumerators had to revisit those households for several times.

However we believe that the setting up of district centers in each of the 51 districts will assist in hosting the enumerators within each district in the future censuses for ease of data collection activities and ease the challenge of travelling.

Data Integration Process

For the first time, Census 2021 dataset includes administrative (admin) information to impute records of people who were missed out during the census field operation. The Census 2021 dataset includes information obtained through field collection, as well as administrative information, available to the Bureau through formal arrangements. Information are only added to the census dataset if they were in Samoa on census night, and have not already responded to the census. Datasets includes Census Listing 2020, Agriculture Census 2020 and Population Census 2016, as well as the Civil registration and Health information registers.

The household frame of more than 30,000 households was used to collect and guide the enumerators during the fieldwork. This information was collected from the listing activity in 2020 in preparation for the census enumeration. The final Census 2021 dataset response rate was 98 percent.

The use of administrative data has enabled us to information about people to include in the Census 2021 dataset where we are sure they should have been counted but unavailable during the enumeration period. The focus is on the key census demographic information namely age, sex, and geographic areas.

In working with this process the Census will also look at data integration methodology in the near future in order to cater for unforeseen circumstances like pandemics while in the starting or middle of data collection. We've also worked with our international colleagues at National Statistical Offices from New Zealand and Australia, leveraging of methods that they have developed, and their expertise, to provide input and review to our own work.

Methodology

Statistical Tools Used.

In previous Censuses, the data collection used paper form (PAPI) while data processing and tabulation being done using CSPro 7.5. Data was keyed in manually after the collection in the office. The PHC 2021 was the first in the series of censuses to adopt the Computer Assisted Personal Interview (CAPI) tool, a change that encourage efficiency and effectiveness in data collection, with assurance of quality.

Analysis was performed using CSPro 7.5 and excel applications. The questionnaire was administered via Computer Assisted Personal Interview (CAPI) using Android tablets and CSEntry CAPI software. The editing process was lead and administered by ACEO Data Processing and ACEO-Census divisions

In order to have a final clean dataset to prepare indicators and different analysis, the Data Processing and Census division's staff was working on the process of data editing and data cleaning. Once the raw dataset is cleaned, a clean copy of the dataset will be named as the 'latest edited data' using dates of changes. By the 2nd week of October 2022, both the Census-Survey and the Data Processing divisions managed to complete all the edits on the census 2021 raw dataset in preparation for the indicator in compilation process for the Fact sheet and selected tables prepared in the final report.

Percentage of female headed household	24	27	24	24	21	27	24
Average household size (Private households)	6.6	6.1	6.5	6.9	6.7	6.1	6.7

Note:

The sex ratio is the number of males per 100 females.

The dependency ratio is a measure showing the number of dependents, aged 0-14 and age 65years and over, to the total working age population of 15-64. It is also referred to as the "total dependency ratio"

People with disability categorize as compilation of two level of difficulties - a lot of difficulties and cannot do at all specified as disability

The median age is the age that divides a population into two numerically equal groups. i.e., half the population is younger than this age and half is older.

Urban area refers to the Apia urban area (AUA) comprising of 4 political districts namely Vaimauga 2,3,4 and Faleata 1 while the rural area refers to the other 3 remaining regions of North West Upolu (NWU), Rest of Upolu (ROU) and Savaii (SAV), comprising of the remaining 47 political districts.

EXECUTIVE SUMMARY

On the 6th of Nov 2021, the Population of Samoa was **205,557** (51percent were male and 49percent were female) .The new count shows an increase of 9,578 people as compares to 195,979 recorded in 2016 census. **Upolu Island** continues to have the bigger share of the total population which is 78percent. The growth on Upolu island has been directed at **North West Upolu** region (**37percent**) and less on the central Apia Urban Area region(**18percent**) . **Faleata 1** is the most populated district (**6percent**) but Falealupo is the least populated district(**0.4percent**) among the 51political districts. There are more males than females especially in the young age which gives a sex ratio of **104males to 100 females**, but when it comes to life expectancy , females are expected to live longer for **77years** compares to **74years** for **males**. The median or average age of the total population was **22years** reflecting a young and youthful Samoan population .The youthful population indicated continuous demands for developments catering for the needs of the younger population such as education, health and employment opportunities.

Religion

The **Congregational Christian Church of Samoa** (CCCS/EFKS) still the dominant religion in Samoa with **27%** in 2021. This is followed by the Catholic Church (19%) the Latter Day Saints (18%), the Methodist (12%) , the Assembly of God (AOG) (10%) and all other churches have been catching up with their share of attendants, as they all made up 16% of the total church attendants in 2021.

Education

The majority of the population aged **3years** and above had ever attended the **Secondary school level of year 9-13 (48percent)**. The majority of population **15years** and above had attained **School Certificate or lower (36percent)** as their highest qualification.

Persons with disabilities

Out of 177,788persons aged 5years and above interviewed for disability questions, about **2.5percent** of them had some form of disabilities.

Household

The majority of households in Samoa enumerated in the census 2021 were private households with a total of **31,137** and **19**households were institutional households and the average household size for private household was 6.6.

MODULE 1:- LIST OF HOUSEHOLD MEMBERS

First complete P2-P4 vertically for all household members, starting with the head of the household. Once P2-P4 are completed for all members, make sure to probe for additional members: Those that are not currently at home, any infants or small children and any others who may not be a family relative (such as maids, babysitters, friends) but who usually live in the household should be listed in this household. Then, ask questions P5-P86 for each member one at a time. If additional questionnaires are used, indicate by ticking this box:

P1. Line number	P2. First, please tell me the names of each person who usually lives here, starting with the head of the household. E mafai ona faailoa uma mai tagata e masani ona nonofo i le tou Auaiga amata mai le ulu o le aiga. <i>Probe for additional household members. Use name(s) given in the Birth Certificate</i>					P3. What is the relationship of (name) to (name of the head of household)*? O le a le faia a (name) ia (name of the head of household)*?		P4. Is (name) male or female? O (name) o se alii po'o se tamaitai? 1 MALE 2 FEMALE		P5. What is (name)'s date of birth? O lea le Aso, Masina ma le Tausaga fanau o (name)? 98 DK (Day/Month) 9998 DK (Year)			P6. How old is (name)? E fia tausaga o (name) <i>Record in completed years.</i>	P7. Where was (name) born? O fea sa fanau ai (name)? <i>Refer 4 digit codes (PG82 – PG88) in the manual</i>
