

SAMOA
BUREAU OF STATISTICS

STATISTICAL ABSTRACT

2025

49th Edition

STATISTICAL ABSTRACT

2025

PREFACE

The Samoa Bureau of Statistics is pleased to present the 49th series of Publication of “STATISTICAL ABSTRACT 2025”. This publication serves as an appropriate statistical reference, which presents annual aggregated statistical information collected and compiled by the Bureau pertaining to social, economic, environment and other detailed subject matters.

Emphasis is given to the most recent available statistical data obtained from source references of various Government Ministries, Corporations and Non-Government Organizations (NGOs) cited. The count of the population, its migratory characteristics, and changes in prices of goods and services are exclusively collected and processed in-house through censuses and surveys.

We are very thankful and appreciative to Government Ministries and Corporation and NGOs for their determined cooperation and assistance in providing the required information and are further encouraged to make their data needs known for consideration in planning future series.

Leota Aliielua Salani

1.1 Geography

The islands of Samoa in the Central South Pacific lie between 13° latitude and 15° south and 168° longitudes and 173° west, close to the International Date Line. The Samoa group is located 2,600 miles (4200 km) south-east of Hawaii, 1800 miles (2,900 km) from New Zealand and 2,700 miles (4300 km) from Sydney, Australia. The nearest neighbour is American Samoa, the capital Pago-Pago being only 80 miles (130 km) away. The Independent State of Samoa consists of two main islands, Savaii and Upolu, with eight smaller islands Apolima, Manono, Fanuatapu, Namu'a, Nu'utele, Nu'ulua, Nu'ulopa, and Nu'usafe'e. The total land area is 1,100 sq. miles (2,830 sq. km.). Savaii is the largest island (660 sq. miles or 1,700 sq. km.). The second largest island is Upolu with an area of 430 Sq. miles or 1,100 sq. km where the capital Apia is located. In the Population and Housing Census 2021, Samoa's total population stood at 205,557.

The islands are of volcanic origin clearly visible in the form of several dormant volcanoes and lava fields. The highest point is Mt Silisili located in Savaii at 1,800 meters. Beyond the narrow coastal plains, the mountain ranges rise steeply to a maximum of 6,095 feet (1,859 meters) on Savaii and 3,608 feet (1,100 meters) on Upolu intersected by fertile valleys. Lush vegetation and rain forest cover the greater part of the country.

Image: Sopoaga Falls Upolu Island

The country, which consists of 343 villages for administrative purposes, is divided into 51 districts. These districts are further grouped into four census regions namely Apia Urban Area (AUA), North-West Upolu (NWU), Rest of Upolu (ROU) and Savaii (SAV).

The main Island of Upolu, where the capital of Apia is situated, has a total population of 159,664 persons representing 77.7 percent of the total population while the rest of the population resides in Savaii totalling 45,175 persons representing 22.0 percent and 718 for Manono and Apolima Islands with their total share of 0.3 percent. The official languages are Samoan and English.

1.2 Climate

The climate of Samoa is tropical with abundant rainfall. Humidity averages 80 percent. The average daily temperature range is from 22°C to 30°C with very little seasonal variation. There are two major distinguishable seasons. The wet season extends from

November through April, the dry season from May to October during which period the climate is pleasant because of fresh trade winds. The annual rainfall averages 2,880 mm, although there is great variation with latitude and location.

1.3 Climate Change and Vulnerability

*Image: Flooding in Savaii, June 2023
(Source: Samoa Observer)*

The adverse effects of climate change and sea-level rise present significant risks to the sustainable development of Pacific Island Countries and Territories (PICTs) as discussed at the 2017 United Nations Climate Change Conference. PICTs such as Samoa experience a high level of risk from the effects of extreme weather and climate variability. Climate models suggest that the tropical Pacific region will continue to warm. This warming has the potential to alter and indeed increase such risks, through changing the frequency and/or intensity of extreme weather or climate variability phenomena or through accelerated sea-level rise. The impacts of these climate events will exacerbate already stressed marine, freshwater and terrestrial environments.

1.4 History

It is believed by many that Samoa is the cradle of Polynesia in which Savaii is the legendary island Hawaii, the original home of Polynesians who later explored the Pacific from Hawaii to Easter Island. New Zealand archaeological research carried out in Samoa suggests that the islands have been inhabited for at least 2,500 years.

The first European who sighted the group and made brief contact with the population of Manu'a (American Samoa) was the Dutchman Jacob Roggerveen in 1722. The first 'papalagi' (white people) to settle in Samoa were sailors, whalers, beachcombers and escaped convicts, many of whom landed by chance in Samoa. The first notable 'agents of change' were the missionaries.

After the arrival of John Williams of the London Missionary Society in the 1830s the Samoans were rapidly converted to Christianity. Methodist and Catholic Missionaries established Missions in the following years. From the 1840s onward, Germany, the United States and Great Britain extended their influence on the island groups. In the 1880s as rivalry amongst the largest factions intensified, the Samoans turned to the foreign powers for support. In 1889, naval ships arrived to settle the problems. A major battle was only averted by a hurricane, which wrecked six of the seven ships. The

*Image: Ship wreck at Apia port, 15-16
March, 1889*

fighting ceased and an elaborate agreement was reached in Berlin by the major powers. Samoa was allowed to remain a neutral state ruled by the three nations.

After some initial problems, the German Administration was relatively stable and Samoa prospered. However, with the onset of the First World War, in 1914 New Zealand assumed the occupation of Samoa and in 1919 was granted a ‘League of Nations’ mandate to administer the country. Over the years, challenges to the New Zealand authorities grew, especially from amongst the matai (chiefs), the traditional leaders, who organized themselves in forming a peaceful movement advocating independence (the Mau movement). Attempts to crush this movement failed and finally in 1936, with the Labour Party in power in New Zealand, the Mau was recognized as a ‘Legitimate Political party’.

Image: Mau Leaders and Tupua Tamasese Lealofi III (centre in white) in front of Mau Office, Vaimoso 1929

In 1953 preparations started for the transition to independence, which was finally obtained in January 1962 making Samoa the first South Pacific Island Nation to attain such status. In 2012 Samoa celebrated its 50 years of independence.

1.5 Government and Fa’asamoa

Image: Samoa’s Parliament House

Samoa is a parliamentary democracy with a unicameral legislative assembly now consisting of 51 members elected by citizens aged 21 years and over, with an additional female candidate to meet the constitutional provision of 10 percent of seats to be held by women are not met. However, only holders of *matai* titles (customary title passed on land and kinship for most parts) are eligible to be elected as Members of Parliament. Therefore, according to the 2021 Census, only 14,638 males and 1,444 females are eligible to stand for the next general election in 2026. The general elections are held every five years.

The Prime Minister is selected by the ruling party and, in turn, appoints fourteen parliamentarians to form the Cabinet. The Fa’atuatua I le Atua Samoa Ua Tasi (FAST) party, led by the Prime Minister Honourable Laaulialemalietoa Polataivao Fosi Schmidt, is currently the ruling party after winning the general elections in 2025.

The constitution, established in 1960, blends traditional and democratic institutions and processes and recognizes the separation of powers (legislature, judiciary and executive). Samoa has a Westminster legal system based on the English legal system as adopted by many of the Commonwealth countries.

Image: Samoan Matai

Today, as in the past, the social unit of Samoan life is the ‘aiga’ or extended family. The ‘aiga’ is headed by at least one matai, who is appointed by the consensus of the aiga. There are two distinct types of matai titles, the ‘Ali’i’ or Chief Matai and the ‘Tulafale’ or Orator Chief. The matai assumes responsibility for directing the use of family land, and, other assets belonging to the aiga. He/She must by his/her behaviour honour the title he/she bears and the people he/she represents. In return for his leadership, the matai is rendered services by the ‘tautua’ (untitled).

The 2017 Village Fono Amendment gives village councils authority over village law and order, health and social issues. The matai constitutes the council or ‘fono’ of the village. Presiding over the fono is the ‘Sui o le Malo’ (village mayor). The position is appointed by Government on recommendation from the village council. A Women’s Representative, ‘Sui Tamaita’i, is also appointed by Government on the recommendation from the women’s councils and act as the contact between the government and the women in the villages.

Rooted in this social organization is the Samoan Way or ‘fa’a-Samoa’, which places great importance on the dignity and achievement of the group rather than its individual members. Religion plays an important role in Samoan life where the majority of the people are strong adherents to the Christian faith. This faith is symbolized in the motto

Image: Catholic Church at Lepea

of Samoa, ‘Fa’avae i le Atua Samoa’ (Samoa is founded on God) and is given physical expression in the impressive number of churches seen throughout the country. Based on the 2021 Census of Population and Housing, the predominant church affiliations are EFKS/ Congregational Christian Church of Samoa, Roman Catholic, The Church of Jesus Christ of Latter-Day Saints and Methodist Church with 30.0 percent, 18.0 percent, 17.6 percent and 11.8 percent respectively.

The social and cultural institutions of Samoan Society (fa’a-Samoa) are strong and more intact than in most parts of Polynesia. The country’s system of village government is particularly well organized and coherent and is the focal point of a network of social

relationships that provide honour and prestige to its members. However, Samoa is no longer a society of largely self-sufficient local units. Imported food and other items are now established as basic household necessities.

1.6 Population

Image: A Samoan Family

The people of Samoa are Polynesian. The population in 2021 totalled 205,557 and though mostly Samoans, included other Pacific Islanders, Europeans, mostly from New Zealand, some Chinese and other nationalities.

Very little is known about the size of the population of the Samoan Groups before the arrival of missionaries in the early 1830s. Some estimates are available but knowledge about the islands was too limited and estimates made by early settlers were generally unreliable. The situation improved during succeeding years, particularly as a result of missionary reports, but the difficulty of collecting and verifying figures led to considerable variations in the accuracy of early estimates.

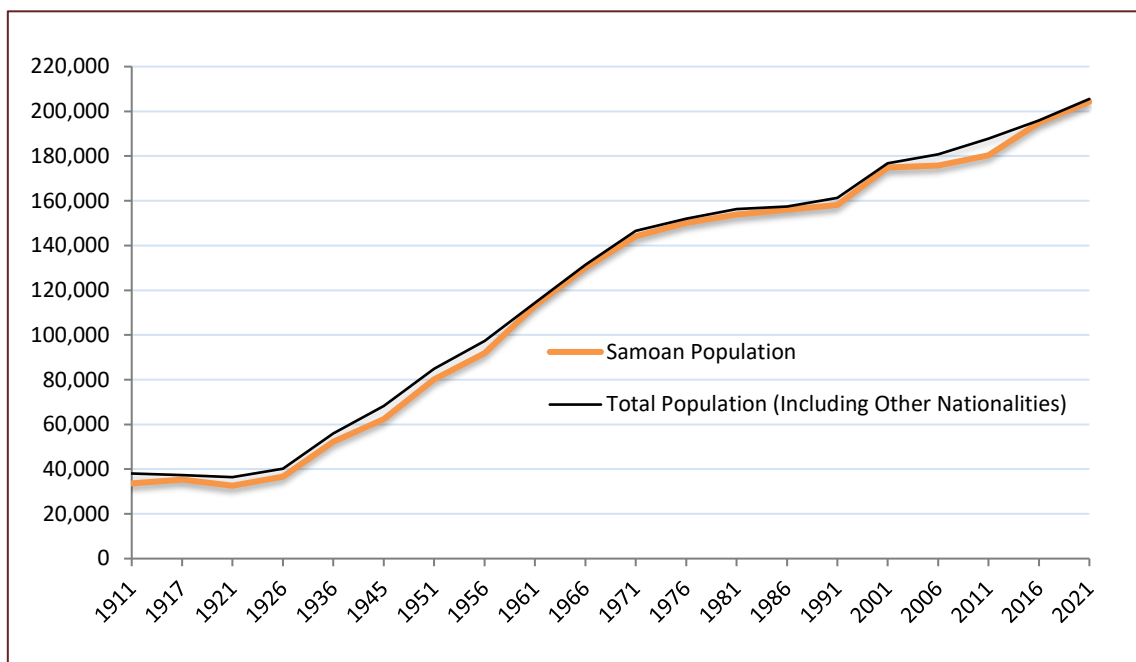

The 1853 and 1869 Missionary Censuses were perhaps the first attempt at scientific measurement of the population of Samoa. However, these two censuses estimated the population at about 30,000 but given the limited capability to conduct censuses, they were both probably undercounts of the true population. The various estimates available in the second half of the nineteenth century showed little variation from this figure. This relative stability over time was a consequence of the balance between the high birth rate, which led to rapid growth in some years, and the high death rates in other years as epidemics of diseases spread throughout the country.

The population of the Samoan archipelago since or even before Western contacts has been the subject of much discussion. Figures available for periods earlier than those covered by the missionary census, suggest that in the 1830's the population was closer to 50,000, indicating that a steep decline in the population did occur in the islands that now constitute Samoa. During the nineteenth century a similar decline had been observed in other Polynesian countries. However, all these data should be treated with caution, since their source and reliability vary considerably. Though they provided some strong evidence that population decline occurred, the extent of that decline must remain very much in doubt.

More reliable population figures are available from censuses carried out during the twentieth century. The German Authorities made population counts in 1900, 1902, 1906 and 1911. In 1917 the New Zealand administration carried out its first census of Samoa and from 1921 introduced a regular 5 yearly census. In 1905 the German authorities

also instituted a system of birth and death registration. The population as recorded at the various censuses from 1911 to 2021 is shown in Figure 1.1.

Figure 1.1 Population of Samoa 1911 – 2021

Source: Samoa Bureau of Statistics

In the beginning of the twentieth century several epidemics reversed the increasing trend in population growth that had occurred in the earlier years. The 1918 epidemic was the first major setback to New Zealand prestige and consequently great emphasis was placed on the improvement of health conditions and sanitation. This proved successful as shown by the rate of population growth in the next decades, as a result of continuing high fertility and a drop in mortality. After 1945, mortality continued to decline, though less pronounced than in the 1920s and 1930s. Fertility remained at a high level in conformity with the Samoan cultural tradition favourable to large families.

Image: SS Talune. The ship that brought the Spanish flu pandemic from NZ to Samoa, 1918

A distinctive feature of population of Samoa is emigration. Emigration in the first half of the twentieth century was of minor importance. It was only during the 1960s that the trend of extensive overseas migration, especially to New Zealand began to accelerate. The impact of overseas migration on the growth of the population has been of major importance, and has also had a profound influence on the social and economic structure of the country. The greater part of the slowing growth rate at least up to the late 1980s, must consequently be explained by the large outflow of people from Samoa.

1.7 The Economy

Samoa's traditional village economy has historically been dominated by village and community-based agriculture. This provided food for the family and the potential for cash income from the sale of copra or other produce. However, in the years since independence the traditional village economy has changed markedly, and now household food consumption is supplemented by imported items and incomes are boosted by domestic employment and remittances from family members living and/or working overseas through the Recognized Seasonal Employment Scheme (RSE), Pacific Australia Labour Mobility (PALM) scheme and Star Kist.

Image: Samoan RSE workers

Figure 1.2 GDP Growth Rates (at constant prices), 2021 – 2025

Source: Samoa Bureau of Statistics

Economic activity, as measured by real Gross Domestic Product (GDP), was estimated to have expanded by 1.8 percent in 2025, reaching \$2,583.7 million (\$2.6 billion) in constant 2013 prices. This marks the fifth consecutive year of positive growth, reflecting the continued recovery and resilience of the Samoan economy. Growth was underpinned by sustained domestic demand, ongoing public sector activity, and improving performance across key private sector industries.

The expansion in economic output was broad-based, with notable contributions from Finance and Business Services, Communication, Public Administration, Electricity and Water, Personal and Other Services, Construction, and Accommodation and Restaurants. The continued growth in these industries highlights the strengthening of service-based activities and the gradual normalization of economic conditions following recent

external and domestic challenges. Overall, the 2025 GDP outcome points to a sustained recovery trajectory, supported by both public and private sector-led economic activity.

1.8 Pathway for the Development of Samoa 2021/22 – 2025/26

The Pathway for the Development of Samoa 2021/22 – 2025/26 sets out the vision of “Fostering Social Harmony, Safety, and Freedom for All”. The pathway focuses on 5 Strategic Outcomes across 21 Priority Areas as shown below.

Pathway for the Development of Samoa 2021/2022 - 2025/2026	
Key Strategic Outcome 1: Improved Social Development	
Key Priority Area 1:	Alleviating Hardship
Key Priority Area 2:	Improved Public Health
Key Priority Area 3:	Quality Education
Key Priority Area 4:	People Empowerment
Key Priority Area 5:	Skilled Workforce
Key Strategic Outcome 2: Diversified and Sustainable Economy	
Key Priority Area 6:	Community Development
Key Priority Area 7:	Agriculture, Fisheries and Aquaculture Productivity
Key Priority Area 8:	Tourism Revitalisation
Key Priority Area 9:	Business Innovation and Growth
Key Priority Area 10:	Increased Labour Mobility
Key Priority Area 11:	Macroeconomics Stability
Key Strategic Outcome 3: Security and Trusted Governance	
Key Priority Area 12:	Empowered Legislation
Key Priority Area 13:	Improved Accountability
Key Priority Area 14:	Dynamic Global Relations and Partnership
Key Strategic Outcome 4: Secured Environment and Climate Change	
Key Priority Area 15:	Build Climate Resilience
Key Priority Area 16:	Effective Environmental Protection and Management Frameworks
Key Priority Area 17:	Enhanced Conservation and Sustainable Use of Natural Resources
Key Priority Area 18:	Sustainable Energy Development Enhance
Key Strategic Outcome 5: Structured Public Works and Infrastructure	
Key Priority Area 19:	Responsive Public Utility Services
Key Priority Area 20:	Innovative Information, Communication and Technology Use
Key Priority Area 21:	Consolidated Infrastructure Management

1.9 Samoa Statistics Strategy 2022-2026

In February 2023, the Samoa Bureau of Statistics released its second Statistics Strategy 2022-2026, the first being in July 2011 (SSDS 2011 – 2021), with two main objectives:

1. Meet the Need of the Users, by

❖ *Producing Priority Statistics*

- Having a core program for census and survey for the next 4 years
- Compiling Priority Statistics by Domain namely Social Statistics, Population, Demography and Vital Statistics, Economic Statistics and Sector and Environment Statistics

❖ *Make Statistics easy to access and Use*

- Improving Access and Use of Statistics

2. Strengthen Samoa's Statistical Capacity, including;

❖ *The Statistical Environment*

- The regulatory framework, statistical standards and international best practice to ensure its credibility.

❖ *The Statistical Infrastructure*

- The frames and registers such as the Business Register, Household Frame and BDM Register
- Frameworks such as the System of National Accounts 2008 and the System of Environmental Economic Accounting 2012
- Standards and Classifications such as International Standard Industrial Classification R4, International Standard Classification of Occupation 2008, Classification of Individual Consumption According to Purpose 2018, Standard International Trade Classification R4, International Standard Classification of Education 2011
- Analytical Tools and Systems for the collection and dissemination of statistical information such as CSPPro, STATA and SDMX

❖ *The Physical Infrastructure*

- Digitise the production and dissemination of official statistics.
- Appropriate office space

❖ *Human Resource*

- Strengthening of data skills
- Foster on-the-job training due to the introduction of new tools and processes in the collection, processing and analysing data.

As a result of the full implementation of this strategy, the expected objectives and results would be to establish an Official Statistics System that:

- ❖ Better provides the information needed to develop and monitor policies for Samoa
- ❖ Better provide information to meet national, regional and international commitments
- ❖ Increases the timely availability, quality, coverage, transparency and usefulness of statistics on Samoa and its people
- ❖ Increases user satisfaction
- ❖ Increases skills and efficiency of those working in statistics
- ❖ Serves as a roadmap for actions by agencies that are part of Samoa's National Statistical System

2.0 Communications Strategy and Costed Implementation Plan/Monitoring & Evaluation 2023-2026

The Samoa Bureau of Statistics launched its first Communications Strategy on 30th May 2024 in Savaii. The strategy has one goal with two main objectives as shown below.

❖ *Goal*

- To “Make statistics easy to access and promote their use” through the development of relevant communications products and related services.

❖ *Objectives*

1. Develop simplified communication products (summary reports, website content, presentations, video clips, infographics, press release, pull-up banners, TV ads) and make them available in the most suitable format and mode for target audiences.
2. Establish a communication unit to provide an enabling environment to engage audiences and to implement all activities and services to achieve Objective 1.

CHAPTER 2: ECONOMIC STATISTICS

Key Points

- Samoa's Gross Domestic Product for 2025 was approximately \$3.6 billion Tala in current prices and \$2.6 billion Tala in constant prices.
- Real GDP growth in 2025 was 1.8 percent.
- Industries with the biggest shares of GDP in 2025 were Financial Services, Business Services, Communications, Public Administration, Electricity and Water, Personal and Other services, Construction and Accommodation and restaurants.
- In 2025, Samoa exported \$71.759 million Tala worth of merchandise and imported \$1.339 billion Tala worth of merchandise.
- Merchandise trade balance was a deficit of \$1.267 billion Tala in 2025.
- Samoa's principal domestic exports in 2025 were Petroleum Products, Food and Machinery and Vehicles Equipment.
- The main imports in 2025 were Food, Petroleum Products, Machinery and Vehicles and Manufactured Goods.

2.1 National Accounts / GDP

National Accounts are statistics focusing on the structure and evolution of economies and provide information on economic performance. Gross Domestic Product (GDP) is Samoa's official measure of economic growth and is compiled and published using the **production** and **expenditure approaches**. The Production approach (also known as the value-added approach) measures the total value of goods and services produced in Samoa, minus the cost of goods and services used in the production process. The expenditure approach to calculating GDP takes into account the sum of all final goods and services purchased in an economy over a set period of time which includes all consumer spending, government spending, business investment and net exports.

Broad Industry Groups: The GDP tables below follow the broad groupings based on the International Standard Industrial Classification (ISIC) Rev 4.0. Classification of economic activity is important in the determination of the extent and nature of the information collected and the quality of the data compiled

- **Primary** industries (agriculture and fishing)
- **Secondary** or goods-producing industries (manufacturing, construction, electricity & water)
- **Tertiary** or service industries (wholesale trade; retail trade and accommodation; transport, postal, and warehousing; information media and telecommunications; finance and insurance services; rental, hiring, and real estate services; professional, scientific, technical, administrative, and support services; public administration and safety; education and training; health care and social assistance; arts, recreation, and other services);
- Financial intermediation services indirectly measured (IC); and
- Taxes less Subsidies.

Table 2.1.1: GDP at Market Prices by Industry (SAT\$ m), 2021 - 2025

	2021	2022	2023	2024 ^R	2025
<i>At current prices</i>					
Agriculture	166.08	209.45	254.47	251.23	259.97

Note 1: Total Estimate is based on the annual growth rate of 0.87 percent from Census 2016 except for 2016. Revised population for Census year 2021 with an annual growth rate of 0.98 percent thereafter from Census 2021.

2.2 Balance of Payments

The Balance of Payments is a record of Samoa's international transactions with the rest of the world (including merchandise trade (imports and exports), trade in services, international investment and remittances).

Table 2.2.1: Balance of payments (*), 2021 – 2025 (SAT\$ m)

Information for users

The latest Balance of Payments statistics, produced by the Central Bank of Samoa, can be found in the CBS Quarterly Bulletin of Statistics. <http://www.cbs.gov.ws/statistics>

2.3 Government Finance Statistics

Government Finance Statistics provide statistics that enable policymakers and analysts to study developments in the financial operations, financial position and liquidity situation of the government sector in a consistent and systematic manner. Balancing items have been created to provide summary information such as Net Operating Balance (NOB) and Net Lending (+) or Borrowing (-). The detailed data can also be used to examine specific areas of government operations, for example: particular forms of taxation, level of expense and the amount of government borrowing etc.

The harmonization of this system with other macroeconomic statistical systems like the System of National Accounts means that data from the GFS can be combined with data from NA to assess government performance in relation to the rest of the economy. Similarly, it can also be used for inter country analysis of government operations, such as comparisons of ratios of taxes or expense to gross domestic product.

SBS compiles Government Finance Statistics using the GFS 2014 Manual. It provides detail information on revenues and expenses on a quarterly basis. Provided in this publication also is the Expenditure classified by Function of Government (COFOG) data set.

This is one of the developments that the Bureau has been working on in conjunction with the Ministry of Finance with the technical assistance provided by the IMF Expert. This dataset adds more information in monitoring and evaluating progress of the Government Sector, as well as its contribution to various sectors of the economy.

Note 1: These debts consist entirely of concessional loans that are mostly financed by the Asian Development Bank, World bank and China

2.4 Consumer Price Index

The Consumer Price Index (CPI) measures the rate of inflation for Samoa. It is designed to measure the change in prices for the goods and services purchased by households in Samoa, by comparing the prices for a basket of goods and services at the collection period with the price for the same goods in a base period.

The basket of goods that is priced is based on the average expenditures of households as recorded in the Household Income and Expenditure Survey (HIES). The HIES identifies how much households spend on different items. The more households spend on an item on average, the more important it is to the price index and therefore the higher its weight in the index.

The groups with the largest weights in the basket are Food and Non-alcoholic beverages, Transport, Alcoholic beverages & Tobacco and Housing, Water, Electricity, Gas and other fuels. The most common food items are chicken leg quarters, sugar, bread, corned beef, taro, rice and biscuits. The main items in the Transport index are petrol, taxi and bus fares, air fares and used and new cars. Beer and cigarettes are the main items in the Alcoholic beverages & Tobacco group and electricity, water, liquid gas and housing rentals are the main ones in Housing, Water, Electricity, Gas and other fuels.

The Local Market Survey collects the price and volume of selected agricultural produce every month from the local markets and stalls around Upolu and Savaii such as the Fugalei, Taufusi, Afega and the Salelologa markets while stalls include Vaitele, Lotopa, Ululoloa, Saleimoa, Vaoala, Faato'ia and Moata'a. This survey is conducted every Thursday for rural markets in Upolu and Savaii and every Friday for urban markets in Upolu. Weights are based on the year 2014 (base period).

Staple food such as taro, coconut, and banana and vegetables such as pumpkins, cabbages and cucumbers are the main produce being supplied at both markets and stalls.

Information for users

The Consumer Price Index series introduced in 2016 were based on the findings of the Household Income and Expenditure Survey conducted in 2013-2014. The new CPI series replaces the previous one, which was based in 2010.

2.5 Trade – Imports, Exports and Prices

Overseas Merchandise Trade provides statistics on the exports, imports and the trade balance of a country. It records the movement of goods between Samoa and other countries. Exports are valued fob (free on board – the value of goods at Samoa ports before export) and include re-exports. Imports are valued C.I.F (cost, including insurance and freight) to Samoa. The trade balance is the difference between the total exports and total imports of goods.

Samoa’s major export markets are New Zealand, USA, Australia and Singapore. The top commodities exported in 2025 were Petroleum Products, Food and Machinery & Vehicles

For imports, our major import markets are New Zealand, Singapore, China, Fiji and Australia. The top commodities imported in 2025 were Food, Petroleum Products, Machinery & Vehicles and Manufactured Goods.

Import Price Index (IPI)

The Import Price Index measures changes in the cost, insurance, and freights (CIF) prices of imports of goods into Samoa. The items included in the index were selected on the basis of their importance to total import.

Table 2.5.1: Balance of Merchandise Trade, 2016–2025

Period	Exports (fob) (a)	% change over previous year	Imports (cif) (b)	% change over previous year	Trade Balance (a-b)

2.7 Other economic indicators

The Shipping statistics provide the total number of international sea going vessels arriving at the port. The information is collected from shipping forms and cargo manifests which are completed by the Shipping agents and Stevedores as a port requirement. They record the number of tons of cargo by Dead Weight Tonnage (DWT), the Gross Registered Tonnage (GRT) and the Net Registered Tonnage (NRT) of inward vessels such as Container Vessels, Mineral Oil Tanker Vessels and General Cargo Container Vessels.

Table 2.7.1: Arrival of Vessels by Type of Class, 2016 - 2025

Key Points

- ❖ Samoa's population in 2021 was 205,557 of whom 38.5 percent were aged under 15 years old and 5.5 percent were aged 65 or over.
- ❖ The average annual growth rate of the population between 2016 and 2021 was 0.9%.
- ❖ Total Arrivals of 250,984 reported in 2025 decreased by 163 when compared to 251,147 reported in 2024.
- ❖ Total Visitors of 183,147 reported in 2025 increased by 3,557 when compared to 179,590 reported in 2024.

3.1 Population

Population information comes from the Population and Housing Census. The Census counts every person in the country and collects a wide range of social, economic and demographic information about each individual and their housing. The Census is carried out every five years. The most recent census was held in November 2021 and the next census will be conducted in October - November 2026.

Table 3.1.1: Total population by urban-rural residency, year and percentage of annual growth, 2008 - 2025

Year ¹	Total Population	% Annual Growth	Urban Population	% Annual Growth	Rural Population	% Annual Growth
2008	183,573	0.8	37,319	-0.5	146,254	1.1

3.2 Migration Statistics

International Arrivals and Departures are very important indicators of the contribution of tourism to the economy as well as providing information on population movement in-and-out of Samoa. Furthermore, the statistics are compiled from Arrival and Departure Cards.

Table 3.2.1: Arrivals and Departures by Sex and Net Migration, 2016 - 2025

Period	Arrivals			Departures			Net Migration
	Total	Male	Female	Total	Male	Female	
2016	197,396	103,016	94,380	203,714	105,909	97,805	-6,318

Information for users

The source of the data on arrivals and departures are the cards completed by departing and arriving passengers collected by the Ministry of Prime Minister & Cabinet (Immigration Division), Ministry of Agriculture (Bio-Security Division) and the Ministry of Revenue (Customs Division), and processed and analysed by the Samoa Bureau of Statistics. Missing information were completed where possible, from scanned passport information from the Immigration Border Management system.

3.3 Births, Deaths and Marriage Statistics

CHAPTER 4: ENVIRONMENT STATISTICS

Environment Statistics provide information about the state and changes of environmental conditions, the quality and availability of environmental resources, the impact of human activities and natural events on the environment and the impact of changing environmental conditions.

They also provide information about the social actions and economic measures that societies take to avoid or mitigate these impacts and to restore and maintain the capacity of the environment to provide the services that are essential for life and human well-being.

Climate: Seasonal temperature differences in Samoa are very small. The wet season extends from November to April. Rainfall is greatly influenced by the position and strength of the South Pacific Convergence Zone, which lies between Samoa and Fiji during the wet season.

Southern Upolu gets more rain than the northern, but much of it falls at night. Upolu is generally wetter than Savaii. The rainfall feeds Samoa's many spectacular waterfalls and supports the luxuriant vegetation.

December to March is the hurricane season. In recent years, Samoa has suffered an increasing number of devastating hurricanes as the surrounding seas warm up due to climate change.

Water: Samoa is blessed with abundance of water resources. Most of all water use in Samoa is abstracted from surface water and the majority of the supplied water use is consumed by households. The bureau compiled water aggregates and indicators using the UN System of Environmental-Economic Accounting (SEEA) 2012.

Energy: Samoa's heavy dependence on imported energy products is the driving force behind one of the Energy Sector's main goals: to increase renewable energy contributions in order to achieve 70.0% renewable energy use by the end of 2031, as stipulated in the Pathway for the Development of Samoa (PDS 2021/22–2025/26).

Furthermore, the Electricity and Energy Statistics—compiled using the UN System of UN System of Environmental-Economic Accounting (SEEA)—presented here provide valuable insights into Samoa's energy supply and use. These essential energy indicators are necessary not only to guide effective planning and policy development for the sector, but also to monitor the progress of its established goals.

Source: Samoa Bureau of Statistics, Samoa Water Authority and Independent Water Scheme

Note:

- (a) Unmetered water use for industry was estimated by calculating the average metered water use for each individual industry.
- (b) Unmetered household water use was estimated by calculating the average household metered water use.
- (c) Expenditure for unmetered water use for SWA was provided while IWSA unmetered industry water use was estimated using flat rate of \$SAT10.
- (d) Expenditure for unmetered households was estimated by \$SAT10 maintenance fee/month for IWSA customers while SWA customers was provided

Table 4.3.3: Estimated Expenditure on Distributed Water Use by Industries and Households, 2019-20 to 2023-24 (SAT\$ m)

Industries	2019-20	2020-21	2021-22	2022-23	2023-24
Agriculture, Livestock and Fishing	300,453	213,402	295,162	161,628	204,788
Manufacturing and Construction	570,970	326,738	380,510	409,348	451,776
Manufacturing	497,510	259,749	300,276	324,604	322,261
Construction	60,166	64,425	77,668	76,697	106,639
Mining & Quarrying	13,294	2,604	2,566	8,047	22,875

2022	2,106.0	1,272.8	238.6	125.6	3,743.0
2023	2,352.6	1,804.9	404.3	135.7	4,697.5

Source: Petroleum Products Supply & Ministry of Customs and Revenue

¹ **NEID** is the extent of which Samoa relies on imported energy to meet its needs. It is calculated as net energy imports minus exports, divided by total primary energy supply

² **Degree of Energy Self Sufficiency** is the proportion of Samoa's energy needs that are met by domestic energy resources. It is calculated as the ratio of primary energy production to domestic end use of energy.

³ ADO is Automobile Diesel Oil; ULP is Unleaded Petrol; DPK is Dual Purpose Kerosene; LPG is Liquefied Petroleum Gas

Table 4.5.3: End Use by Total Industry, Households and Re-exports, Samoa 2019-2023 (TJ)

Year	Industry	Households	Re-Exports	Total ¹

Source: Samoa Bureau of Statistics

Note:

R: Revised figures based on GDP Production, September 2025, Quarter

a. Population projection except for Population Census Years 2016 and 2021.

b. Net domestic energy use refers to the amount of energy that is end used minus re-exports.

c. Fossil fuel for Energy Account Samoa refers to ADO, ULP, DPK and LPG

d. Expresses the energy used by production activities in terms of GDP. Calculated by immediate consumption of energy products by industries divided by total nominal GDP multiplied by 1,000,000

e. Refers to the total end use of energy by households multiplied by 1000 divided by total population

Information for users

The latest editions of Water Account and Energy Account reports produced by the Samoa Bureau of Statistics can be found on the bureau's website

5.1 Health

Health Statistics are mainly sourced from Demographic and Health Surveys (DHS) and Multi Clustered Indicator Surveys (MICS), which collected information on population and health. The first ever survey conducted by the bureau where the 2 surveys were merged together to be called DHS-MICS was conducted in 2019-

2020, where it will be carried out every five years and covering subjects such as fertility, family planning, maternal and child health, nutrition, and diseases. Health indicators include General Fertility rates and Crude Birth rates by residence, Early Childhood Mortality rates, Knowledge of AIDS, as well as Knowledge of HIV prevention methods

Table 5.1.1: Health SDG 2030 Indicators

	SDG 2030 Indicator	Value
2.2.1	Stunting Prevalence: Percentage of children under age 5 who fall below (a) Minus two standard deviations (moderate and severe) (b) Below minus three standard deviations (severe) of the median height for age of the WHO standard	7.3% 3.5%
2.2.2	Wasting Prevalence: Percentage of children under age 5 who fall below (a) minus two standard deviations (moderate and severe) (b) minus three standard deviations (severe) of the median weight for height of the WHO standard	3.1% 1.2%
2.2.2	Overweight Prevalence: Percentage of children under age 5 who are above (a) two standard deviations (moderate and severe) (b) three standard deviations (severe) of the median weight for height of the WHO standard	8.7% 2.5%
3.1.2	Percentage of women age 15-49 years with a live birth in the last 2 years whose most recent live birth was attended by skilled health personnel	88.9%
3.2.1	Under 5 Mortality Rate (Probability of dying between birth and the fifth birthday per 1,000 live births)	20
3.2.2	Neonatal Mortality Rate (Probability of dying within the first month of life per 1,000 live births)	5
3.7.1	Percentage of women age 15-49 years currently married or in union who have their need for family planning satisfied with modern contraceptive methods	29.4%
3.7.2	Age-specific fertility rate for women age 15-19 years	55
3.8.1	Percentage of children under age 5 with ARI symptoms in the last 2 weeks for whom advice or treatment was sought from a health facility or provider	72.4%
3.a.1	Percentage of women and men age 15-49 years who smoked cigarettes or used smoked or smokeless tobacco products at any time during the last one month: -Women -Men	12.5% 35.4%

5.2 Education

While the Samoan education system has achieved much over the years, we still have room to grow, especially in terms of dropout and retention rates. Recent Samoan national reports highlight education as a critical issue in the perpetuation of rural poverty. The 2018 Samoa Hardship and Poverty Report described a strong correlation between poverty, vulnerability status and the level of education of Samoan citizens. The analysis found that males in the North West Upolu Region with only primary school education are more likely to be vulnerable to poverty than other demographics

Table 5.2.1: Education SDG 2030 Indicators

	SDG 2030 Indicator	Value	
4.1.1	(a) Percentage of children who successfully completed three foundational reading tasks		
	Age 7-14		
	Age for grade 2/3	45.5%	
	Attending grade 2/3	31.5%	
	(b) Percentage of children who successfully completed foundational number tasks	21.6%	
	Age 7-14		
	Age for grade 2/3	22.7%	
	Attending grade 2/3	17.2%	
		11.7%	
4.1.2	Percentage of children age 3-5 years above the intended age for the last grade who have completed that grade	(a) Primary School	97.0%
		(b) Lower Secondary School	96.5%
		(c) Upper Secondary School	56.1%
4.2.1	Early Child Development Index: Percentage of children age 36-59 months who are developmentally on track in at least three of the following four domains: literacy-numeracy, physical, social-emotional and learning	73.3%	
4.2.2	Percentage of children in the relevant age group (one year before the official primary school entry age) who are attending an early childhood education programme or primary school	55.0%	
4.4.1	Percentage of women and men who have carried out at least one of nine specific computer related activities during the last 3 months	Women:	
		(a) Age 15-24	22.8%
		(b) Age 15-49	18.3%
		Men:	
		(a) Age 15-24	20.5%
		(b) Age 15-49	16.9%

5.3 Labour Force

The labour force, or currently active population, comprises all persons who fulfil the requirements for inclusion among the **employed** and the **unemployed**. The **employed** are defined as those who work for pay or profit for at least one hour a week, in-

cluding those who were absent from the job or enterprise temporarily such as those who were sick, or on paternity, maternity or annual leave. The **unemployed** are defined as those who were not in employment, carried out activities to seek employment and currently available.

5.4 Formal Employment

Employment is the total number of persons who are engaged in paid work. It includes all persons who are either part timers or full-time workers and are employed either in the public or private sectors (working for wages).

Formal Employment is employment that is Government regulated, such that workers are ensured a wage and certain employment rights. It includes all employees and employers in the formal sectors who have registered under the SNPF. It does not include the informal sector and individual contributors such as proprietors, self-employed workers, unpaid family or volunteer workers, farm workers, and domestic workers who are not registered with the SNPF.

Table 5.4.1: Total Registered Employees by Industry, 2021 - 2025

6.1 Sustainable Development Goals (SDGs)

What are the SDGs? The Sustainable Development Goals (SDGs), otherwise known as the Global Goals for Sustainable Development, are a collection of 17 global goals set by the United Nations in 2015.

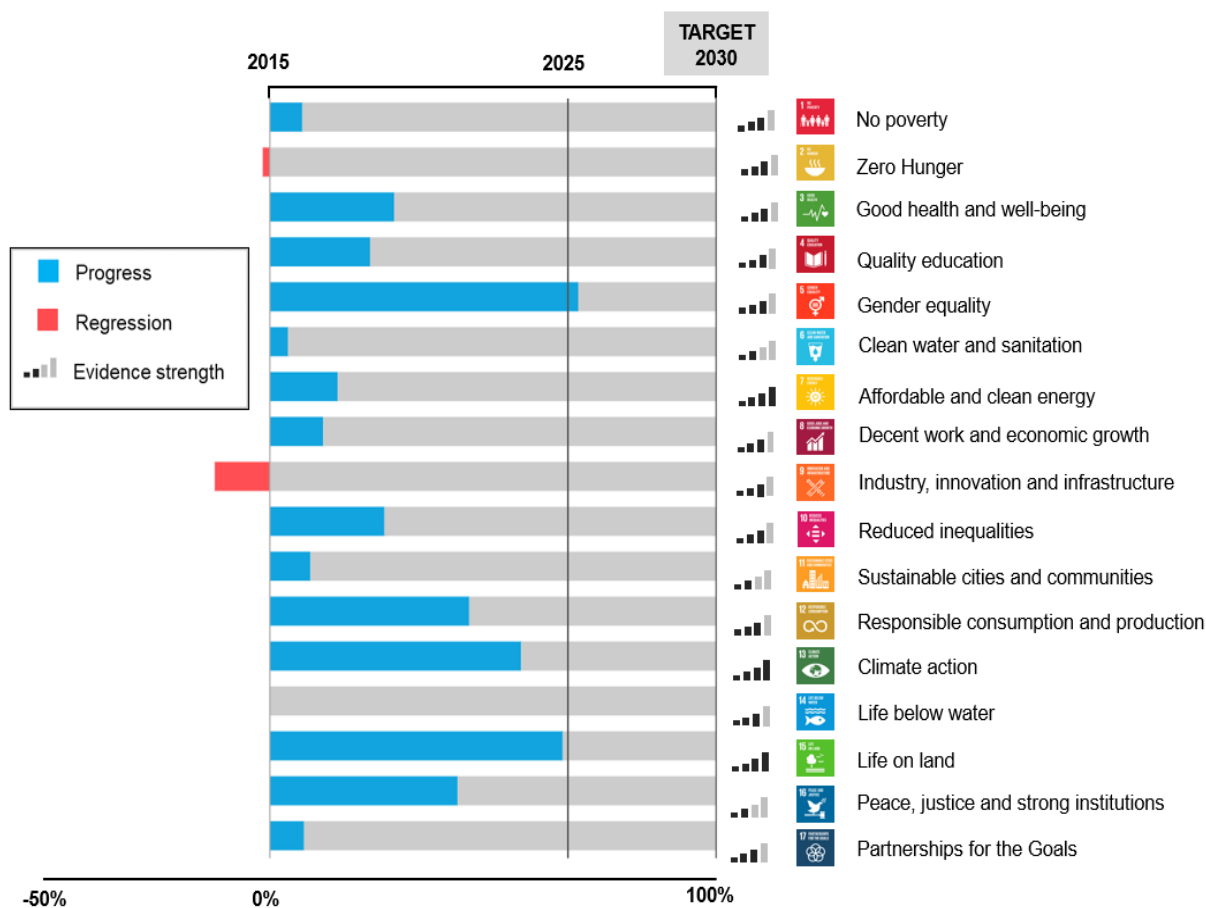

The formal name for the SDGs is: “Transforming our World: the 2030 Agenda for Sustainable Development”. That has been shortened to “2030 Agenda”. The goals are broad and interdependent, yet each has a separate list of targets to achieve. Achieving all 169 targets would signal accomplishing all 17 goals and 251 indicators. The SDGs cover social and economic development issues including poverty, hunger, health, education, global warming, gender equality, water, sanitation, energy, urbanization, environment and social justice.

The goals are interconnected – often the key to success on one will involve tackling issues more commonly associated with another.

The matrix below will provide readers with a more comprehensive overview of Samoa's efforts in fostering social harmony, safety and freedom for all the people of Samoa by achieving these goals.

6.2 Samoa's SDG 2030 Goal Tracker Progress

▪ Accelerating Goals

Goals on track to achieve target by 2030 (Colour blue – above 2025). i.e.; Goals 5 (Gender Equality) and 15 (Life on Land).

▪ Progressing Goals

Goals making steady progress but not at the level it's supposed to be (Colour blue – below 2025). i.e.; Goals 1 (No Poverty); 3 (Good Health and Well-being); 4 (Quality Education); 6 (Clean Water and Sanitation); 7 (Affordable and Clean Energy); 8 (Decent Work and Economic Growth); 10 (Reduced Inequalities); 11 (Sustainable Cities and Communities); 12 (Responsible Consumption and Production); 13 (Climate Action); 14 Life Below Water); 16 (Peace, Justice and Strong Institutions) and 17 (Partnership for the Goals).

▪ Regressing Indicators

Indicators moving away from the set target (Colour red). i.e.; Goals 2 (Zero Hunger) and 9 (Industry, Innovation and Infrastructure).

6.3 Samoa's Global Indicator Framework for SDG 2030 Agenda

Goal 1. End Poverty in All Its Forms Everywhere				
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
1.1 By 2030, eradicate extreme poverty for all people everywhere, currently measured as people living on less than \$1.25 a day	1.1.1 Proportion of the population living below the international poverty line by sex, age, employment status and geographic location (urban/rural). IPL = USD2.15/ person in 2022.	6.1% (HIES 2013)	0.40%	SBS (HIES 2023)
1.2 By 2030, reduce at least by half the proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions	1.2.1 Proportion of population living below the national poverty line, by sex and age	18.8% (HIES 2013)	15.20%	SBS (HIES 2023)
	1.2.2 Proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions	29.2% (HIES 2018)	15.20%	SBS (HIES 2023)
1.3 Implement nationally appropriate social protection systems and measures for all, including floors, and by 2030 achieve substantial coverage of the poor and the vulnerable	1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, new-borns, work-injury victims and the poor and the vulnerable			
	1.3.1.a Proportion of older persons receiving and old-age pension by sex	98.9%. SBS (PHC 2016) and NPF (SSCBF Annual Report 2019-2020)	98.5%.	SBS (PHC 2021) and NPF (SSCBF Annual Report 2021-2022)
	1.3.1.b Proportion of workers covered in case of employment injury by sex	53.5 (2019)	44.2% (2021)	UNSTATS SDG Data portal

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
1.4 By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance	1.4.1 Proportion of population living in households with access to basic services (a) Percentage of household members using improved sources of drinking water either in their dwelling/yard/plot or within 30 minutes round trip collection time (b) Percentage of household members with a hand washing facility where water and soap or detergent are present (c) Percentage of household members using improved sanitation facilities which are not shared	(a) Access to safe drinking water 97.7% (c) Access to sanitation services 94.1% Source: DHS 2009	(a) 98.8 % (b) 78.8% (c) 96.1%	SBS (Samoa DHS-MICS 2019-2020)
	1.4.2 Proportion of total adult population with secure tenure rights to land, (a) with legally recognized documentation, and (b) who perceive their rights to land as secure, by sex and type of tenure	NA		
1.5 By 2030, build the resilience of the poor and those in vulnerable situations and reduce their exposure and vulnerability to climate-related extreme events and other economic, social and environmental shocks and disasters	1.5.1 Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population	2012 Tropical Cyclone Evans 6.3 per 100,000. Source: MNRE/World Bank IDA Doc, Oct 2019	2018 Cyclone Gita 0 deaths, 0 missing, 0 seriously injured, homeless 0	MNRE/World Bank IDA Doc, Oct 2019
	(a) Directly affected persons attributed to disasters, Per 100,000 population	2,690 (2019)	64 (2023)	UNSTATS SDG Data portal
	(b) Deaths and missing persons attributed to disasters, Per 100,000 population	39 (2019)	13 (2022)	UNSTATS SDG Data portal
	1.5.2 Direct economic loss attributed to disasters in relation to global gross domestic product (GDP)	2012 TC Evans USD\$ 210.7 M or 28% of 2011 GDP [SAT 480M]. Source: SOE 2013	Cyclone Gita USD\$0.45m or 0.1% of 2017 GDP (SAT\$2.5m)	World Bank Samoa IDA Document Oct 2019/ MNRE

		0 (2015)	0 (2023)	UNSTATS SDG Data portal
	1.5.3 Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction 2015–2030	Yes. (Samoa has an updated National Disaster Management Plan (NDMP) 2017 - 2020; a National Action Plan 2018 - 2021; a DRM Gender Policy and a Disaster Risk Reduction Plan. The communities also have disaster and climate management plans).		MNRE-NDMO/ UNISDR

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
5.6 Ensure universal access to sexual and reproductive health and reproductive rights as agreed in accordance with the Programme of Action of the International Conference on Population and Development and the Beijing Platform for Action and the outcome documents of their review conferences	5.6.1 Proportion of women aged 15–49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care	NO DATA COMPILED FOR SAMOA		
	Proportion of married women 15-49 who make their own health care decisions			
	5.6.2 Number of countries with laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education	There is a National Sexual and Reproductive Health Policy		
5.a Undertake reforms to give women equal rights to economic resources, as well as access to ownership and control over land and other forms of property, financial services, inheritance and natural resources, in accordance with national laws	5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure	The existing legal framework guarantees women’s equal rights to land ownership and /or control		
	5.a.2 Proportion of countries where the legal framework (including customary law) guarantees women’s equal rights to land ownership and/or control	The existing legal framework guarantees women’s equal rights to land ownership and /or control		
5.b Enhance the use of enabling technology, in particular information and communications technology, to promote the empowerment of women	5.b.1 Proportion of individuals who own a mobile telephone, by sex	41.1% (T); 20.9% (M); 20.4% (F) Source: HIES 2013	15 - 49 age group Men (80.6%) Women (77.4%)	SBS (Samoa DHS-MICS 2019-2020)
5.c Adopt and strengthen sound policies and enforceable legislation for the promotion of gender equality and the empowerment of all women and girls at all levels	5.c.1 Existence/ Establishments of systems to track and make public allocations for gender equality and women’s empowerment (1 = Yes/ 2 = No)	1 (2018)		UNSTATS SDG Data portal

Goal 6. Ensure Availability and Sustainable Management of Water and Sanitation for All

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
6.1 By 2030, achieve universal and equitable access to safe and affordable drinking water for all	6.1.1 Proportion of population using safely managed drinking water services	54.7%	54.7%	SBS (Samoa DHS-MICS 2019-2020)
6.2 By 2030, achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations	6.2.1 Proportion of population using (a) safely managed sanitation services and (b) a hand-washing facility with soap and water	(a) 96.1% (b) 78.8%		SBS (Samoa DHS-MICS 2019-2020)
6.3 By 2030, improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling and safe reuse globally	6.3.1 Proportion of domestic and industrial wastewater flows safely treated			
	Proportion of domestic wastewater flows safely treated	46.68 (2020)	43.81 (2024)	UNSTATS SDG Data portal
	6.3.2 Proportion of bodies of water with good ambient water quality	100 (2020)	100 (2023)	UNSTATS SDG Data portal
6.4 By 2030, substantially increase water-use efficiency across all sectors and ensure sustainable withdrawals and supply of freshwater to address water scarcity and substantially reduce the number of people suffering from water scarcity	6.4.1 Change in water-use efficiency over time	SAT\$14.24/m ³ (USD\$6.02/m ³) 2019/20	SAT\$17.14/m ³ (USD\$7.25/m ³) 2023/24	SBS (Water Account Report 2023/24)
	6.4.2 Level of water stress: freshwater withdrawal as a proportion of available freshwater resources	NO DATA COMPILED FOR SAMOA		
6.5 By 2030, implement integrated water resources management at all levels, including through transboundary cooperation as appropriate	6.5.1 Degree of integrated water resources management	70 (2017)	75 (2023)	UNSTATS SDG Data portal
	6.5.2 Proportion of transboundary basin area with an operational arrangement for water cooperation	NO DATA COMPILED FOR SAMOA		

6.6 By 2020, protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and lakes	6.6.1 Change in the extent of water-related ecosystems over time			
	(a) Mangrove total area change (%)	1.22 (2015)	-0.76 (2020)	UNSTATS SDG Data portal
	(b) Lakes and rivers seasonal water area (square kilometers)	1.45 (2015)	2.34 (2022)	UNSTATS SDG Data portal
	(c) Lakes and rivers permanent water area (square kilometers)	2.37 (2015)	2.59 (2022)	UNSTATS SDG Data portal
6.a By 2030, expand international cooperation and capacity-building support to developing countries in water- and sanitation-related activities and programmes, including water harvesting, desalination, water efficiency, wastewater treatment, recycling and reuse technologies	6.a.1 Amount of water- and sanitation-related official development assistance that is part of a government-coordinated spending plan			
	6.a.1 Total official development assistance (gross disbursement) for water supply and sanitation (USD 2024 constant price)	20.5925 (2015)	5.5479 (2024)	UNSTATS SDG Data portal
6.b Support and strengthen the participation of local communities in improving water and sanitation management	6.b.1 Proportion of local administrative units with established and operational policies and procedures for participation of local communities in water and sanitation management	31 independent Water Schemes and Village Watershed Management Plans for the Independent Water Schemes.		Water and Sanitation Sector 11th Annual Performance Review report 2017/18
Goal 7. Ensure Access to Affordable, Reliable, Sustainable and Modern Energy for All				
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
7.1 By 2030, ensure universal access to affordable, reliable and modern energy services	7.1.1 Proportion of population with access to electricity	96.3% Source: PHC 2016	99.20%	SBS (Samoa DHS-MICS 2019-2020)
	7.1.2 Proportion of population with primary reliance on clean fuels and technology	Cooking only 25.5% Source: PHC 2011	47.40%	SBS (Samoa DHS-MICS 2019-2020)

7.2 By 2030, increase substantially the share of renewable energy in the global energy mix	7.2.1 Renewable energy share in the total final energy consumption	30.8% (2016)	23.3% (2023)	SBS Energy Account Report 2023
7.3 By 2030, double the global rate of improvement in energy efficiency	7.3.1 Energy intensity measured in terms of primary energy and GDP	0.75 (2016)	0.86 (2023)	SBS Energy Account Report 2023
7.a By 2030, enhance international cooperation to facilitate access to clean energy research and technology, including renewable energy, energy efficiency and advanced and cleaner fossil-fuel technology, and promote investment in energy infrastructure and clean energy technology	7.a.1 International financial flows to developing countries in support of clean energy research and development and renewable energy production, including in hybrid systems (2023 USD constant prices)	0.03 (2015)	6.79 (2024)	UNSTATS SDG Data portal
7.b By 2030, expand infrastructure and upgrade technology for supplying modern and sustainable energy services for all in developing countries, in particular least developed countries, small island developing States and landlocked developing countries, in accordance with their respective programmes of support	7.b.1 Installed renewable energy-generating capacity in developing countries (in watts per capita)			
	Renewable energy per capita (watts)	64.7431 (2015)	149.8677 (2024)	UNSTATS SDG Data portal
Goal 8. Promote Sustained, Inclusive and Sustainable Economic Growth, Full and Productive Employment and Decent Work for All				
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
8.1 Sustain per capita economic growth in accordance with national circumstances and, in particular, at least 7 per cent gross domestic	8.1.1 Annual growth rate of real GDP per capita	5.2 (2015)	2.2 (2024)	UNSTATS SDG Data portal

product growth per annum in the least developed countries

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
10.6 Ensure enhanced representation and voice for developing countries in decision-making in global international economic and financial institutions in order to deliver more effective, credible, accountable and legitimate institutions	10.6.1 Proportion of members of developing countries in international organizations by organizations			
	(a) member of international organization	ADB (1.49%); IMF (0.53%); WTO (0.63%); IFC (0.54%); UNGA (0.52%); IBRD (0.53%). (2015)	ADB (1.47% - 2022); IMF (0.53%); WTO (0.61%); IFC (0.54%); UNGA (0.52%); IBRD (0.53%). (2023)	UNSTATS SDG Data portal
	(b) voting rights of developing countries in international organizations	ADB (0.30%); IMF (0.03%); WTO (0.63%); IFC (0.03%); UNGA (0.52%); IBRD (0.06%). (2015)	ADB (0.30% - 2022); IMF (0.03%); WTO (0.61%); (0.03%); UNGA (0.52%); IBRD (0.06%). (2023).	UNSTATS SDG Data portal
10.7 Facilitate orderly, safe, regular and responsible migration and mobility of people, including through the implementation of planned and well-managed migration policies	10.7.1 Recruitment cost borne by employee as a proportion of monthly income earned in country of destination	NO DATA COMPILED FOR SAMOA		
	10.7.2 Countries with migration policies that facilitate orderly, safe, regular and responsible migration and mobility of people (1 = requires further progress, 2 = partially meets, 3 = meets, 4 = fully meets)	2 (2019)	2 (202)	UNSTATS SDG Data portal
	10.7.3 Number of people who died or disappeared in the process of migration towards an international destination	0		
	10.7.4 Proportion of the population who are refugees, by country of origin	0 (2015)	5.9 (2025)	UNSTATS SDG Data portal

10.a Implement the principle of special and differential treatment for developing countries, in particular least developed countries, in accordance with World Trade Organization agreements	10.a.1 Proportion of tariff lines applied to imports from least developed countries and developing countries with zero-tariff	Agricultural products (89.36%); Clothing (80.0%); Industrial products (74.40%); Textiles (68.42%). (2015)	Agricultural products (80.95%); Clothing (44.44%); Industrial products (60.71%); Textiles (30.77%). (2025)	UNSTATS SDG Data portal
10.b Encourage official development assistance and financial flows, including foreign direct investment, to States where the need is greatest, in particular least developed countries, African countries, small island developing States and landlocked developing countries, in accordance with their national plans and programmes	10.b.1 Total assistance for development (ODA + OOF + private), by recipient, Million US dollars	95.2 (2015)	138.53 (2024)	UNSTATS SDG Data portal
10.c By 2030, reduce to less than 3 per cent the transaction costs of migrant remittances and eliminate remittance corridors with costs higher than 5 per cent	10.c.1 Average remittance cost of sending \$200 to a receiving country as a proportion of the amount remitted (%)	8.48 (2015)	6.44 (2025)	UNSTATS SDG Data portal
Goal 11. Make Cities and Human Settlements Inclusive, Safe, Resilient and Sustainable				
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
11.1 By 2030, ensure access for all to adequate, safe and affordable housing and basic services and upgrade slums	11.1.1 Proportion of urban population living in slums, informal settlements or inadequate housing		0	

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
11.2 By 2030, provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons	11.2.1 Proportion of population that has convenient access to public transport, by sex, age and persons with disabilities	58% of HH the population use buses and taxis for land transportation and 34% use private vehicles. 44% of all HH in Samoa owned a vehicle. Source: SBS (PHC 2016)	47.5% of HH use buses and taxis for land transportation and 51.6% use private vehicles. 52.1% of all HH in Samoa owned a vehicle.	SBS (PHC 2021)
11.3 By 2030, enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management in all countries	11.3.1 Ratio of land consumption rate to population growth rate	NO DATA COMPILED FOR SAMOA		
	11.3.2 Proportion of cities with a direct participation structure of civil society in urban planning and management that operate regularly and democratically	NO DATA COMPILED FOR SAMOA		
11.4 Strengthen efforts to protect and safeguard the world's cultural and natural heritage	11.4.1 Total per capita expenditure on the preservation, protection and conservation of all cultural and natural heritage, by source of funding (public, private), type of heritage (cultural, natural) and level of government (national, regional, and local/municipal)	NO DATA COMPILED FOR SAMOA		
11.5 By 2030, significantly reduce the number of deaths and the number of people affected and substantially decrease the direct economic losses relative to global gross domestic product	11.5.1 Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population			
	(a) Directly affected persons attributed to disasters, Per 100,000 population	2,719 (2019)	9,136 (2023)	UNSTATS SDG Data portal

caused by disasters, including water-related disasters, with a focus on protecting the poor and people in vulnerable situations	(b) Number of missing persons attributed to disasters, Per 100,000 population	0 (2020 - 2025)		UNSTATS SDG Data portal
	(c) Number of deaths attributed to disasters, Per 100,000 population	83 (2019)	29 (2022)	UNSTATS SDG Data portal
	11.5.2 Direct economic loss in relation to global GDP, damage to critical infrastructure and number of disruptions to basic services, attributed to disasters	2012 TC Evans USD\$210.7 M or 28% of 2011 GDP (SAT 480M) Source: MNRE/World Bank Samoa IDA Document, Oct 2019	TC Gita USD\$0.45M or 0.1% of 2017 GDP [SAT2.5M]	UNSTATS SDG Data portal
	(a) Direct economic loss attributed to disasters in relation to relative GDP	0 (2022)	0.0024 (2023)	UNSTATS SDG Data portal
	(b) Direct economic loss attributed to disasters (current USD)	0 (2022)	2.2059 (2023)	UNSTATS SDG Data portal
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
11.6 By 2030, reduce the adverse per capita environmental impact of cities, including by paying special attention to air quality and municipal and other waste management	11.6.1 Proportion of municipal solid waste collected and managed in controlled facilities out of total municipal waste generated, by cities	Based on Time and Motion Survey in 2017, proportion of urban area covered by collection contractors was an average of 67% of set collection route.		MNRE
		90% (2018)		UNSTATS SDG Data portal
	11.6.2 Annual mean levels of fine particulate matter (e.g. PM2.5 and PM10) in cities (population weighted)			
	(a) Total	6.7709 (2015)	5.9356 (2023)	UNSTATS SDG Data portal
	(b) Urban	6.9937 (2015)	6.0866 (2023)	UNSTATS SDG Data portal
(c) Rural	6.3358 (2015)	5.5765 (2023)	UNSTATS SDG Data portal	

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
11.7 By 2030, provide universal access to safe, inclusive and accessible, green and public spaces, in particular for women and children, older persons and persons with disabilities	11.7.1 Average share of the built-up area of cities that is open space for public use for all, by sex, age and persons with disabilities	9.6 (2020)		UNSTATS SDG Data portal
	11.7.2 Proportion of persons victim of physical or sexual harassment, by sex, age, disability status and place of occurrence, in the previous 12 months			
	Proportion of women and girls aged 15-49 years who have experienced any sexual violence (committed by any perpetrator)	In the past 12 months 12.6%		SBS (DHS-MICS 2019-2020)
11.a Support positive economic, social and environmental links between urban, peri-urban and rural areas by strengthening national and regional development planning	11.a.1 Number of countries that have national urban policies or regional development plans that respond to population dynamics; ensure balanced territorial development; and increase local fiscal space (1=yes 2=no)	1 (2020)	1 (2023)	UNSTATS SDG Data portal
11.b By 2020, substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigation and adaptation to climate change, resilience to disasters, and develop and implement, in line with the Sendai Framework for Disaster Risk Reduction 2015–2030, holistic disaster risk management at all levels	11.b.1 Score of adoption and implementation of national DRR strategies in line with the Sendai Framework, Index	0.525 (2017)	0.475 (2023)	UNSTATS SDG Data portal
	11.b.2 Proportion of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies (%)	0 (2017)	3.3149 (2023)	UNSTATS SDG Data portal

11.c Support least developed countries, including through financial and technical assistance, in building sustainable and resilient buildings utilizing local materials	11.c.1 Proportion of financial support to the least developed countries that is allocated to the construction and retrofitting of sustainable, resilient and resource efficient buildings utilizing local materials	NA		
Goal 12. Ensure Sustainable Consumption and Production Patterns				
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
12.1 Implement the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns, all countries taking action, with developed countries taking the lead, taking into account the development and capabilities of developing countries	12.1.1 Number of countries developing, adopting or implementing policy instruments aimed at supporting the shift to sustainable consumption and production (scp)	Have a National Biodiversity Strategy Action Plan, Community Based Fisheries Management Plan 2017, Fisheries Management Act 2016, Aquaculture development and Management Plan, Water Resource Management Regulations 2013, National Water Resources Management Strategy 2007-2017; Waste Management Act 2010, National Waste Management Strategy 2019-2023, Forestry Management Act 2011, National Forestry Plan 2016- 2020, Samoa Coastal Fisheries Management and Development Plan 2013-2016. At the local level, there are numerous district and village sustainable consumption and development plans including 43 District (265 villages) Community Integrated Management Plans (CIM), 109 Village Fisheries Management Plans, 78 Village by-laws, 32 Village Sustainable Development Plans (SVDPs) and 19 Village Watershed Resource Management Plans. (Source: Samoa's 6th National Report 2018 to the CBD). Also have the 2018 Waste Management Policy – already amended and banning Styrofoam plates, cups by June 2020 (MNRE)		
12.2 By 2030, achieve the sustainable management and efficient use of natural resources	12.2.1 Material footprint, material footprint per capita, and material footprint per GDP	NO DATA COMPILED FOR SAMOA		
	12.2.2 Domestic material consumption, domestic material consumption per capita, and domestic material consumption per GDP			
	(a) Domestic material consumption (tonnes)	1,106,266.31 (2015)	1,372,429.10 (2024)	UNSTATS SDG Data portal

	(b) Domestic material consumption per unit of GDP (kg per constant 2020 USD)	1.32 (2015)	1.30 (2024)	UNSTATS SDG Data portal
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
12.3 By 2030, halve per capita global food waste at the retail and consumer levels and reduce food losses along production and supply chains, including post-harvest losses	12.3.1 (a) Food waste (tonnes)	23,455.1803 (2019)	27,836.5995 (2022)	UNSTATS SDG Data portal
	12.3.1 (b) food waste per capita (kg)	110.6872 (2019)	125.1747 (2022)	UNSTATS SDG Data portal
12.4 By 2020, achieve the environmentally sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimize their adverse impacts on human health and the environment	12.4.1 Number of parties to international multilateral environmental agreements on hazardous waste, and other chemicals that meet their commitments and obligations in transmitting information as required by each relevant agreement			
	(a) Hazardous waste and other chemicals, Basel convention compliance, Percentage	16.7 (2015)	16.67 (2025)	UNSTATS SDG Data portal
	(b) Hazardous waste and other chemicals, Montreal protocol compliance, Percentage	100 (2015)	100 (2025)	UNSTATS SDG Data portal
	(c) Hazardous waste and other chemicals, Rotterdam convention compliance, Percentage	64.7 (2015)	68.85 (2025)	UNSTATS SDG Data portal
	(d) Hazardous waste and other chemicals, Stockholm convention compliance, Percentage	33.3 (2015)	77.78 (2025)	UNSTATS SDG Data portal
	12.4.2 (a) Hazardous waste generated per capita; and (b) proportion of hazardous waste treated, by type of treatment			
	(a) Municipal waste collected (tonnes)	5,067 (2015)	15,450 (2017)	UNSTATS SDG Data portal
	(b) Proportion of Municipal waste treated, landfill	96.33 (2015)	93.42 (2017)	UNSTATS SDG Data portal
	(c) Municipal waste treated, composting (%)	2.30 (2015)	1.0 (2017)	ESCAP Dataexplorer

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
12.5 By 2030, substantially reduce waste generation through prevention, reduction, recycling and reuse	12.5.1 National recycling rate, tons of material recycled			
	Municipal waste recycled (tonnes)	70 (2015)	863 (2017)	UNSTATS SDG Data portal
12.6 Encourage companies, especially large and transnational companies, to adopt sustainable practices and to integrate sustainability information into their reporting cycle	12.6.1 Number of companies publishing sustainability reports	NO DATA COMPILED FOR SAMOA		
12.7 Promote public procurement practices that are sustainable, in accordance with national policies and priorities	12.7.1 Degree of sustainable public procurement policies and action plan implementation (yes = 1 no = 2)	Samoa has a Public Procurement Policy and Legislation framework. (1)		
12.8 By 2030, ensure that people everywhere have the relevant information and awareness for sustainable development and lifestyles in harmony with nature	12.8.1 Extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education; and (d) student assessment	NO DATA COMPILED FOR SAMOA		
12.a Support developing countries to strengthen their scientific and technological capacity to move towards more sustainable patterns of consumption and production	12.a.1 Installed renewable energy-generating capacity in developing countries (in watts per capita)			
	Renewable energy per capita (watts)	64.7431 (2015)	149.8677 (2024)	UNSTATS SDG Data portal

12.b Develop and implement tools to monitor sustainable development impacts for sustainable tourism that creates jobs and promotes local culture and products	12.b.1 Implementation of standard accounting tools to monitor the economic and environmental aspects of tourism: SEEA tables, Number	0 (2015-2025)	SBS
12.c Rationalize inefficient fossil-fuel subsidies that encourage wasteful consumption by removing market distortions, in accordance with national circumstances, including by restructuring taxation and phasing out those harmful subsidies, where they exist, to reflect their environmental impacts, taking fully into account the specific needs and conditions of developing countries and minimizing the possible adverse impacts on their development in a manner that protects the poor and the affected communities	12.c.1 Amount of fossil-fuel subsidies per unit of GDP (production and consumption)	0	

Goal 13. Take Urgent Action to Combat Climate Change and Its Impacts

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
13.1 Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries	13.1.1 Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population			
	(a) Directly affected persons attributed to disasters, Per 100,000 population	5,700 (2019)	19,794 (2023)	UNSTATS SDG Data portal
	(b) Number of missing persons attributed to disasters, Per 100,000 population	0 (2020 - 2022)		UNSTATS SDG Data portal
	(c) Number of deaths attributed to disasters, Per 100,000 population	83 (2019)	29 (2022)	UNSTATS SDG Data portal

	13.1.2 Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction 2015–2030			
	Score of adoption and implementation of national DRR strategies in line with the Sendai Framework, Index	0.525 (2017)	0.475 (2023)	UNSTATS SDG Data portal
	13.1.3 Proportion of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies	0 (2017)	3.3149 (2023)	UNSTATS SDG Data portal
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
13.2 Integrate climate change measures into national policies, strategies and planning	13.2.1 Existence of the establishment or operationalization of an integrated policy/strategy/plan which increases their ability to adapt to the adverse impacts of climate change, and foster climate resilience and low greenhouse gas emissions development in a manner that does not threaten food production (including a national adaptation plan, nationally determined contribution, national communication, biennial update report or other).	Yes. (There is a National Climate Change Policy. MNRE have worked with various sectors to mainstream CC and resilience into sector plans. (Agriculture climate strategy Health, Education, Tourism, Forest, Private Sector Org) over the past 10 years. There is a National Climate Change Bill. EWACC implemented the review of the National Building Code 2017 Integrated Watershed Management Plan for Greater Apia Urban Area, Develop designs for hard adaptation Solution for Vaisigano river Catchment. Flood modelling of Vaisigano Water Catchment. QGIS training for technical Staff to develop mapping skills. CDCRM Household Survey and data Analysis for 123 Villages and 25 districts. Partnerships to increase resilience through the improvement of livelihoods/social status of vulnerable families through the increase in income generation opportunities such as MoU of selected families supplied items for starting your		MNRE 2020

		microenterprise & entrepreneurship to alleviate adverse effects of CC. Some villages now have a Village Disaster & Climate Management Plan (VDCMP) containing mitigation and response plans & establishing village responses).		
	13.2.2 Total greenhouse gas emissions per year			
	GHG emissions from agriculture (thousand tons of CO2 equivalent)	225.5 (2015)	150.1 (2023)	ESCAP Dataexplorer
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
13.3 Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning	13.3.1 Extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education; and (d) student assessment	NO DATA COMPLETED FORSAMOA		
13.a Implement the commitment undertaken by developed-country parties to the United Nations Framework Convention on Climate Change to a goal of mobilizing jointly \$100 billion annually by 2020 from all sources to address the needs of developing countries in the context of meaningful mitigation actions and transparency on implementation and fully operationalize the Green Climate Fund through its capitalization as soon as possible	13.a.1 Amounts provided and mobilized in United States dollars per year in relation to the continued existing collective mobilization goal of the \$100 billion commitment through to 2025	NA		

13.b Promote mechanisms for raising capacity for effective climate change-related planning and management in least developed countries and small island developing States, including focusing on women, youth and local and marginalized communities	13.b.1 Number of least developed countries and small island developing States with nationally determined contributions, long-term strategies, national adaptation plans and adaptation communications, as reported to the secretariat of UNFCCC	Yes. (Samoa continues to receive climate support from several donor partners and international funds and community).	MNRE/ MOF

Goal 14. Conserve And Sustainably Use the Oceans, Seas and Marine Resources for Sustainable Development

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
14.1 By 2025, prevent and significantly reduce marine pollution of all kinds, in particular from land-based activities, including marine debris and nutrient pollution	14.1.1 Index of coastal eutrophication and plastic debris density			
	% of Chlorophyll-a deviations	1.2876 (2015)	0.0625 (2022)	UNSTATS SDG Data portal
14.2 By 2020, sustainably manage and protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their resilience, and take action for their restoration in order to achieve healthy and productive oceans	14.2.1 Number of countries using ecosystem-based approaches to managing marine areas	Approximately 0.1% of the EEZ under integrated protected area or the equivalent of approximately 14% of the total inshore area (MPA and fisheries reserves exclusive of mangroves). 100% of EEZ is a marine sanctuary for Sharks, Dolphins and turtles. 41 District wide integrated management plans completed and actioned (these apply the ridge to reef approach addressing the thematic areas of infrastructure environment and biological resources that encourage and support the healthy and resilient marine and coastal ecosystems). Marine spatial planning underway for 100% of EEZ by 2023		
14.3 Minimize and address the impacts of ocean acidification, including through enhanced scientific cooperation at all levels	14.3.1 Average marine acidity (pH) measured at agreed suite of representative sampling stations	8.476 (2023)	8.464 (2024)	UNSTATS SDG Data portal

14.4 By 2020, effectively regulate harvesting and end overfishing, illegal, unreported and unregulated fishing and destructive fishing practices and implement science-based management plans, in order to restore fish stocks in the shortest time feasible, at least to levels that can produce maximum sustainable yield as determined by their biological characteristics	14.4.1 Proportion of fish stocks within biologically sustainable levels	NO DATA COMPLETED FOR SAMOA		
14.5 By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information	14.5.1 Proportion of marine key biodiversity areas (KBA) covered by protected areas status	54.2 (2015)	54.2 (2025)	UNSTATS SDG Data portal
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
14.6 By 2020, prohibit certain forms of fisheries subsidies which contribute to overcapacity and overfishing, eliminate subsidies that contribute to illegal, unreported and unregulated fishing and refrain from introducing new such subsidies, recognizing that appropriate and effective special and differential treatment for developing and least developed countries should be an integral part of the World Trade Organization fisheries subsidies negotiation	14.6.1 Degree of implementation of international instruments aiming to combat illegal, unreported and unregulated fishing (1 - lowest 5 - highest)	3 (2020)	3 (2022)	UNSTATS SDG Data portal

TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
14.7 By 2030, increase the economic benefits to small island developing States and least developed countries from the sustainable use of marine resources, including through sustainable management of fisheries, aquaculture and tourism	14.7.1 Sustainable fisheries as a proportion of GDP in small island developing States, least developed countries and all countries	2.22 (2015)	1.55 (2019)	UNSTATS SDG Data portal
14.a Increase scientific knowledge, develop research capacity and transfer marine technology, taking into account the Intergovernmental Oceanographic Commission Criteria and Guidelines on the Transfer of Marine Technology, in order to improve ocean health and to enhance the contribution of marine biodiversity to the development of developing countries, in particular small island developing States and least developed countries	14.a.1 Proportion of total research budget allocated to research in the field of marine technology	NO DATA COMPILED FOR SAMOA		
14.b Provide access for small-scale artisanal fishers to marine resources and markets	14.b.1 Degree of application of a legal/regulatory/ policy/institutional framework which recognizes and protects access rights for small-scale fisheries (1 - lowest 5 - highest)	4 (2018)	5 (2022)	UNSTATS SDG Data portal
14.c Enhance the conservation and sustainable use of oceans and their resources by implementing international law as reflected in the United Nations Convention on the Law of the Sea, which provides the legal framework for the conservation and sustainable	14.c.1 Number of countries making progress in ratifying, accepting and implementing through legal, policy and institutional frameworks, ocean-related instruments that implement international law, as reflected in the United Nations Convention on the Law of the Sea, for the	1		MFAT/MAF/MNRE

use of oceans and their resources, as recalled in paragraph 158 of “The future we want”	conservation and sustainable use of the oceans and their resources (Yes = 1 No = 0)			
Goal 15. Protect, Restore and Promote Sustainable Use of Terrestrial Ecosystems, Sustainably Manage Forests, Combat Desertification, And Halt and Reverse Land Degradation and Halt Biodiversity Loss				
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
15.1 By 2020, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreements	15.1.1 Forest area as a proportion of total land area	58 .2 (2015)	57.5 (2025)	UNSTATS SDG Data portal
	15.1.2 Proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas, by ecosystem type			
	Average proportion of terrestrial key biodiversity areas (KBA) covered by protected areas (%)	47.04 (2015)	47.61 (2025)	UNSTATS SDG Data portal
15.2 By 2020, promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally	15.2.1 Progress towards sustainable forest management	<p>Samoa already half way through its 2 million trees planting target with 1,010,429 total seedlings planted as of Dec 2019. Hectares already restored through 2M tree programme. CIM plans – Ridge to reef approach also cover forests SMCL project support community engagement and ownership of their forest restoration, management plan – conservation areas – and sustainable land management plans. National parks, CCAs, water catchment areas – most of the reforestation work happening at water catchment areas. Forest Area Certification Increasingly identifying baselines for biodiversity through BIORAPS. MNRE Payment for ecosystems services now being piloted</p>		National Sector Steering Committee Quarterly Report Dec 2019

	Above ground biomass in forest (tonnes per hectare)	79.73 (2015)	79.62 (2025)	UNSTATS SDG Data portal
TARGET	INDICATOR	BASELINE DATA	MOST RECENT DATA	DATA SOURCE
15.3 By 2030, combat desertification, restore degraded land and soil, including land affected by desertification, drought and floods, and strive to achieve a land degradation-neutral world	15.3.1 Proportion of land that is degraded over total land area	NO DATA COMPILED FOR SAMOA		
15.4 By 2030, ensure the conservation of mountain ecosystems, including their biodiversity, in order to enhance their capacity to provide benefits that are essential for sustainable development	15.4.1 Coverage by protected areas of important sites for mountain biodiversity			
	Average proportion of Mountain Key Biodiversity Areas (KBAs) covered by protected areas	35.64 (2015)	36.40 (2025)	UNSTATS SDG Data portal
	15.4.2 Mountain Green Cover Index	99.9 (2015)	99.9 (2021)	ESCAP Dataexplorer
15.5 Take urgent and significant action to reduce the degradation of natural habitats, halt the loss of biodiversity and, by 2020, protect and prevent the extinction of threatened species	15.5.1 Red List Index	0.78 (2015)	0.77 (2025)	UNSTATS SDG Data portal
15.6 Promote fair and equitable sharing of the benefits arising from the utilization of genetic resources and promote appropriate access to such resources, as internationally agreed	15.6.1 Number of countries that have adopted legislative, administrative and policy frameworks to ensure fair and equitable sharing of benefits			
	(a) Legislative, administrative and policy framework reported to the Access and Benefit-Sharing Clearing-House (Yes = 1 No = 1).	0 (2021 - 2025)		UNSTATS SDG Data portal
	(b) Nagoya Protocol, country party (Yes = 1 No = 0).	1 (2021 - 2025)		UNSTATS SDG Data portal
	(c) Leg., admin./policy framework reported through Online Reporting Sys. on	0 (2016 - 2025)		UNSTATS SDG Data portal

	Compliance of the Int. Treaty on Plant Genetic Resources for Food & Agriculture (Yes = 1 No = 0).			
	(d) International Treaty on Plant Genetic Resources for Food and Agriculture (PGRFA), contracting party (Yes = 1 No = 0).	1 (2015 - 2025)		UNSTATS SDG Data portal
